Subject: RE: Yes - FW: Question: RAGs Part B Guidance

Hi Brianna,

Never mind. I don't think I can use this for Rad. Though we defer to EPA regs for other COCs when we don't have our own screening levels. I have to defer to CDPH on this one.

Nina

Subject: Question: RAGs Part B Guidance

Hi,

I'm just doing some research. Do you know, would be appropriate to say that in the absence of ARARs, "the 10-6 cancer risk "point of departure" is used as a starting point for analysis of remedial alternatives"? this is from page 12 of the RAGS Part B guidance. Our toxicology dept defers to EPA guidance/screening levels when we do not have our own.
